All-Purpose Pleasures

Systems Designer: Electronics Design Group (EDG), Piscataway, NJ

So you can't decide if you want a home theater; a recreation room or a family room. Is it time to throw in the towel and do nothing? Not if you're the homeowners of this space.

In this room, they can relax and listen to music, share videos and pictures with their family, entertain their friends with pool or games, catch their favorite sporting events, and wow everyone with a movie that recreates a cinematic experience—and all in one room, thanks to the folks at Electronics Design Group (EDG) of Piscataway, NJ.

There are tons of sources, including an HDTV receiver, TiVo digital video

recorder (DVR), a progressive-scan DVD/SACD player, Rotel 7.1 surround-sound processor and very versatile gaming and PC options, including a Dell Dimensions PC with a wireless keyboard and mouse. The Extron game jack controls all of the latest gaming options and connects to their digital cameras.

All of this is viewed on a Stewart GrayHawk 135-inch screen. All of the equipment as well as the lights are controlled by a Crestron touchpanel.

This room really gets a workout, but the homeowners are sure they've scored a winner.

HOME THEATER

◀ **FOCUS** B&W's free-standing CDM9 NT3 is a true three-way speaker, meaning it has separate woofer, midrange, and B&W's trademark tweeters on top.
